

Aditya Walvekar

AI/ML Engineering Student · Software Developer · Commercial Designer

✉ adityawalvekar10@gmail.com  Portfolio: aadi-x.github.io/portfolio  LinkedIn: linkedin.com/in/aditya-walvekar

 GitHub: github.com/aadi-x  Kolhapur, Maharashtra, India

PROFESSIONAL PROFILE

3rd-year Artificial Intelligence & Machine Learning engineering undergraduate at Sanjeevan Institute of Technology. Experienced across 6 verified technical internships and commercial design practice. Combines machine learning algorithmic training, natural language processing pipelines, and clean software architecture with high-impact product aesthetics. Active Google Student Ambassador (2026) and AWS Student Builder.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning 2022 – 2026 (Expected)
Sanjeevan Institute of Technology (SIT), Panhala / Kolhapur Maharashtra, India

TECHNICAL EXPERTISE

Languages: Python (Advanced), JavaScript (ES6+), HTML5, CSS3, SQL, C/C++
AI / ML & Data: Supervised/Unsupervised Learning, NLP (NLTK), Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, EDA
Web & Software: DOM Engineering, HTML5 Canvas API, LocalStorage API, Streamlit, Git, GitHub, REST APIs, Linux CLI
Visual & Design: Adobe Photoshop, Adobe Illustrator, Canva, Commercial Print Design, Brand Identity, UI/UX Layouts

PROFESSIONAL EXPERIENCE Commercial Practice & Engineering Internships

Lead Graphic Designer · Suyash Graphics 2023 – Present · Kolhapur
Commercial Visual Branding, Print Advertising & Digital Campaigns Commercial Practice

- Directed client visual production and delivered 100+ commercial print flyers, flex hoardings, product packaging, and brand assets.
- Spearheaded creative execution using Adobe Photoshop, Illustrator, and Canva, boosting regional client brand engagement.
- Managed print pre-press workflows, color management, and digital campaign formatting for commercial retail accounts.

AI & NLP Intern · Data Alcott Systems Verified Internship · Remote
Applied Computational Linguistics & Text Classification AI / NLP / Python

- Engineered end-to-end NLP pipelines handling raw text cleaning, tokenization, stopword removal, and vocabulary parsing.
- Implemented TF-IDF feature extraction and trained machine learning classification algorithms delivering validated prediction accuracy.
- Structured reusable Python data ingestion routines and documented pipeline performance metrics.

Machine Learning Intern · SkillCraft Technology Verified Internship · Remote
Predictive Modeling & Statistical Machine Learning Machine Learning

- Trained supervised and unsupervised models using Scikit-Learn, conducting feature engineering and hyperparameter optimization.
- Conducted comprehensive exploratory data analysis (EDA), handling missing values and feature scaling across structured tabular datasets.
- Evaluated classification and regression models via cross-validation, precision-recall analysis, and ROC-AUC curves.

Artificial Intelligence Intern · CodeAlpha Verified Internship · Awarded LOR
AI Algorithmic Design & Automation Engineering Awarded Official LOR

- Developed AI automation algorithms and predictive scripts solving real-world computer vision and predictive milestones.
- Awarded an official Letter of Recommendation (LOR) by leadership for exemplary technical accuracy and self-directed problem-solving.

PROFESSIONAL EXPERIENCE (CONTINUED)

AI & NLP Intern · [Codec Technologies Pvt. Ltd.](#)

Verified Internship · Remote

Intelligent Data Analytics & Web Interface Deployment

[AI / ML / Streamlit](#)

- Engineered machine learning classification pipelines and trained NLP algorithms for automated text classification and spam detection.
- Deployed an interactive web-based classification dashboard using Streamlit, enabling real-time model inference for end users.
- Established automated data cleaning routines and feature extraction scripts following clean code standards.

Data Analytics Intern · [CodSoft](#)

Verified Internship · Remote

Exploratory Data Analysis & Statistical Reporting

[Data Analytics](#)

- Performed structured data cleaning, outlier remediation, and correlation analysis on multi-dimensional datasets using Pandas and NumPy.
- Created informative visualization reports and statistical dashboards using Matplotlib and Seaborn to communicate business insights.

Python Developer Intern · [Cognifyz Technologies](#)

Verified Internship · Remote

Object-Oriented Programming & Algorithmic Workflows

[Python Engineering](#)

- Architected modular Python scripts utilizing Object-Oriented Programming (OOP) paradigms and structured error handling.
- Developed algorithmic routines for data filtering, transformation, and automated file manipulation.

FEATURED PROJECTS

[Live Demonstrations & Code Repositories](#)

Habit Tracker Studio

[Live App ↗](#)

Focused daily habit-building web application featuring real-time streak computation, completion metrics, and persistent offline synchronization via LocalStorage API.

[HTML5](#) · [CSS3](#) · [Vanilla JS](#) · [LocalStorage](#) · [Responsive UX](#)

Rocnet Arcade Survival Game

[Play Game ↗](#)

Interactive 2D space arcade game built with HTML5 Canvas. Features a 60fps game rendering loop, physics collision boundary math, particle sparks, and touch controls.

[HTML5 Canvas](#) · [JavaScript](#) · [Game Physics](#) · [Particle Engine](#)

NLP Classification Pipeline

[Docs ↗](#)

Modular text preprocessing and categorization pipeline. Implemented tokenization, stopword filtering, and TF-IDF feature matrices for sentiment classification.

[Python](#) · [NLP](#) · [NLTK](#) · [Scikit-Learn](#) · [Text Processing](#)

Predictive ML & EDA Pipeline

[Docs ↗](#)

End-to-end predictive modeling workflow with statistical data analysis, outlier remediation, feature scaling, and 5-fold cross-validated model evaluation.

[Python](#) · [Scikit-Learn](#) · [Pandas](#) · [NumPy](#) · [Matplotlib](#)

LEADERSHIP & COMMUNITY ROLES

Google Student Ambassador (GSA 2026) · [Google](#)

Active · 2026

Selected to represent Google developer ecosystems on campus, fostering AI literacy, technical workshops, and developer community collaboration.

AWS Student Builder · [Amazon Web Services \(AWS\)](#)

Active · 2026

Member of the AWS Student Builder Group exploring cloud architectures, serverless AI integration, and scalable distributed computing.

VERIFIED INDUSTRY CREDENTIALS & JOB SIMULATIONS

AI for All: From Basics to GenAI — [NVIDIA](#)

Deep Learning, LLM mechanics, and GenAI implementation.

40+ Certifications & Badges Transcript — [Microsoft Learn](#)

Azure AI, Machine Learning, Data Analytics, Python & Cloud.

GenAI Powered Data Analytics — [Tata Group \(Forge\)](#)

Delinquency modeling, risk profiling & executive reporting.

Partnering with AI in Workplace — [Datacom \(Forge\)](#)

Prompt optimization, AI pair-programming & code auditing.

Claude Code 101 — [Anthropic](#)

Agentic AI workflows, prompt architecture, and LLM dev.

Introduction to Generative AI — [Google Cloud / Simplilearn](#)

Transformer architectures, attention mechanisms & cloud AI.

Data Analytics Job Simulation — [Deloitte \(Forge\)](#)

Forensic data analysis, telemetry auditing & problem-solving.

Career Edge: Young Professional — [TCS iON](#)

Corporate communication, business strategy & AI overview.
