💻 github.com/aadi-x | 📍 Kolhapur, Maharashtra, India

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning — 2024 – 2028 (Expected)
Sanjeevan Institute of Technology (SIT) — Panhala, Kolhapur

TECHNICAL SKILLS

Programming:	Python, JavaScript (ES6+), C, C++, SQL, HTML5, CSS3
AI / ML & Data:	Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, NLTK, Natural Language Processing, EDA
Web & Tools:	HTML5 Canvas API, LocalStorage, Streamlit, Git, GitHub, REST APIs, Linux CLI
Visual Design:	Adobe Photoshop, Adobe Illustrator, Canva, CorelDRAW, Brand Identity, Print Media Design

WORK EXPERIENCE & INTERNSHIPS

Commercial & Technical Practice

Lead Graphic Designer & Freelancer · Suyash Graphics — 2023 – Present
Commercial Branding, Print Advertising & Social Media Creatives — Kolhapur, India

- Designed and delivered 100+ commercial print banners, flex hoardings, festival creatives, and marketing flyers for regional retail clients.
- Created digital campaign creatives and promotional assets published on Instagram (@suyashgraphics09).
- Managed complete print pre-press workflows, color calibration, and output formatting using Photoshop, Illustrator, and Canva.

AI & NLP Intern · Data Alcott Systems — Verified Internship
Natural Language Processing & Text Classification — Remote

- Built text preprocessing workflows in Python, performing tokenization, stopword removal, and vocabulary parsing with NLTK.
- Implemented TF-IDF feature extraction pipelines and trained text classification models on multi-class datasets.
- Documented model evaluation metrics and organized reusable data ingestion routines.

Machine Learning Intern · SkillCraft Technology — Verified Internship
Predictive Modeling & Exploratory Data Analysis — Remote

- Performed exploratory data analysis (EDA), handling missing values, feature scaling, and correlation studies on structured datasets.
- Trained supervised learning models using Scikit-Learn with hyperparameter tuning to improve prediction accuracy.
- Evaluated model performance using cross-validation, precision-recall analysis, and ROC-AUC curves.

Artificial Intelligence Intern · CodeAlpha — Verified Internship
AI Algorithmic Problem Solving & Computer Vision — Remote

- Developed Python scripts and machine learning models for computer vision and predictive milestones.
- Awarded an official Letter of Recommendation (LOR) for self-directed problem-solving, project quality, and technical accuracy.

WORK EXPERIENCE & INTERNSHIPS (CONTINUED)

AI & NLP Intern · Codec Technologies Pvt. Ltd. — Verified Internship
Machine Learning Classification & Web Deployment — Remote

- Engineered text classification pipelines for automated categorization and spam detection using Python.
- Built and deployed an interactive Streamlit web application enabling real-time user input and model inference.
- Structured clean, modular scripts for data cleaning and feature engineering.

Data Analytics Intern · CodSoft — Verified Internship
Exploratory Data Analysis & Data Visualization — Remote

- Cleaned and prepared multi-dimensional tabular datasets using Pandas and NumPy, handling outliers and null values.
- Created informative visual reports and analytical charts with Matplotlib and Seaborn to communicate data patterns clearly.

Python Developer Intern · Cognifyz Technologies — Verified Internship
Object-Oriented Python Programming — Remote

- Developed modular Python programs applying object-oriented design principles, custom classes, and exception handling.
- Created automated routines for dataset manipulation, filtering, and structured file operations.

PROJECTS

Live Demos & Repositories

Habit Tracker Studio — Live Demo ↗
HTML5, CSS3, JavaScript (ES6+), LocalStorage API

- Built a focused daily habit-building application featuring real-time streak computation and weekly completion analytics.
- Implemented persistent offline client storage using the browser LocalStorage API with responsive mobile UX.

Rocnet Arcade Survival Game — Play Game ↗
HTML5 Canvas, JavaScript, 2D Physics, Particle Engine

- Developed a 2D space survival shooter running at 60 FPS using the HTML5 Canvas API and custom game loops.
- Programmed projectile collision math, velocity vectors, particle explosion effects, and responsive touch controls.

NLP Text Categorization Pipeline — Documentation ↗
Python, NLTK, Scikit-Learn, Streamlit

- Implemented a modular text preprocessing pipeline including tokenization, stopword filtering, and TF-IDF feature matrices.
- Trained and evaluated classification models for sentiment and topic prediction with an interactive web UI.

Predictive ML & EDA Modeling Workflow — Documentation ↗
Python, Pandas, NumPy, Scikit-Learn, Matplotlib

- Created an end-to-end data science pipeline covering statistical distributions, outlier remediation, and feature scaling.
- Trained supervised classification and regression models evaluated with 5-fold cross-validation and confusion matrices.

LEADERSHIP & COMMUNITY ROLES

Google Student Ambassador (GSA 2026) · Google — Active · 2026
Representing Google developer ecosystems on campus, facilitating workshops, and encouraging student engagement with modern developer tools and AI literacy.

AWS Student Builder · Amazon Web Services (AWS) — Active · 2026
Member of the AWS Student Builder Group exploring cloud architectures, serverless computing, and hands-on cloud developer fundamentals.

CERTIFICATIONS & PROFESSIONAL TRAINING

AI for All: From Basics to GenAI
NVIDIA Deep Learning Institute

Introduction to Generative AI
Google Cloud / Simplilearn

GenAI Powered Data Analytics
Tata Group (Forage Job Simulation)

Partnering with AI in Workplace
